

58)

The screenshot shows a web browser window with multiple tabs. The active tab is titled "Inc" and shows the URL "dev364702.service-now.com/now/nav/ui/cl...". The browser's address bar and bookmarks are visible. Below the browser, the ServiceNow interface is shown. The top navigation bar includes the ServiceNow logo, "All", "Admin", and a search bar. The main header indicates the current page is "Script Include - IncidentClosersUtils" with an application scope of "Global" and an update set of "Default [Global]". The main content area is the "Script Include IncidentClosersUtils" editor. It features a toolbar with icons for undo, redo, save, and other editing functions. A toggle switch for "Turn on ECMAScript 2021 (ES12) mode" is present. The script editor contains the following JavaScript code:

```
1 var IncidentClosersUtils = Class.create();
2 IncidentClosersUtils.prototype = Object.extend(Object.prototype, {
3   AbstractAjaxProcessor: {
4     closeResolvedOlderThan: function(days) {
5       days = parseInt(days, 10);
6
7       if (days <= 0) {
8         gs.warn('Invalid number of days: ' + days);
9         return 0;
10      }
11
12      var closedCount = 0;
13
14      var cutoffDate = new GlideDateTime();
15      cutoffDate.addDaysUTC(-days);
16
17      var gr = new GlideRecord('incident');
18      gr.addQuery('state', '6'); // Resolved
19      gr.addQuery('resolved_at', '<=', cutoffDate);
20      gr.query();
21
22      while (gr.next()) {
```

Below the script editor, there is a "Protection policy" dropdown menu set to "-- None --". At the bottom of the editor, there are "Update" and "Delete" buttons. A "Related Links" section is partially visible at the very bottom.

The screenshot shows a web browser window with the URL `dev364702.service-now.com/now/nav/ui/cl...`. The browser's address bar and tabs are visible at the top. Below the browser, the ServiceNow interface is shown. The header includes the ServiceNow logo, a search bar, and a dropdown menu for 'Script Include - ChangeTaskCounter...'. The main content area displays a script editor for the 'ChangeTaskCounterUtils' script include. The script is written in JavaScript and uses the GlideAggregate class to query the 'change_request' table for a specific 'changeSysId'. The script includes a warning message if no 'changeSysId' is provided and returns the count of records. The script editor has a toolbar with various icons for editing and saving. Below the script editor, there is a 'Protection policy' dropdown set to '-- None --'. At the bottom of the page, there are 'Update' and 'Delete' buttons, and a 'Related Links' section with a link to 'Run Point Scan'.

The screenshot shows a web browser window with the ServiceNow interface. The address bar shows the URL `dev364702.service-now.com...`. The ServiceNow header includes the logo, navigation tabs (All, Client Script - kno...), and application scope information (Global, Default [Global]). The main content area is titled 'Client Script knowledge expiry date chec' and includes 'Update' and 'Delete' buttons. Below the title bar, there is a 'Messages' section and a 'Script' editor. The script editor contains the following JavaScript code:

```
1 function onChange(control, oldValue, newValue, isLoading,
21     return;
22
23
24     // Field was manually cleared by user - hide message
25     if (!newValue || newValue === '') {
26         g_form.hideFieldMsg('valid_to', true);
27         return;
28     }
29
30     // Future date was entered successfully
31     if (newValue > todayStr) {
32         g_form.showFieldMsg('valid_to', 'Expiry date is valid.', 'info');
33     } else {
34         // Caught by our code before new UI clears it
35         g_form.showFieldMsg('valid_to', 'Expiry date must be in the future.', 'error');
36         g_form.setValue('valid_to', '');
37     }
38 }
39
```

At the bottom of the script editor, there is a checkbox labeled 'Isolate script' which is checked.
